

Hektor separates milled PCBs carefully and fast. The offcut material is removed smoothly and precisely. The matrix consists of two parts. This ensures easy and cost-saving change of the blades. Compressed air is used for the separation process. The operating pressure can be set on the machine. When the foot switch is pressed, the off-cut is punched out. The off-cuts are collected in the collecting box. When the gate is opened the waste material can be extracted.

Part No.	Description
8932145	Off-Cut Remover Hektor 2
	Contents of delivery:
	Hektor 2 with air pressure regulator
	Foot switch
	Adapter for dust extraction
	1 L-blade – Please choose the size

Safe Operation

The PCB is slipped with its milled groove over the blade and is placed onto the matrix. The off-cut is pulled under the blade. When the foot switch is pressed, the off-cut is punched out and the waste material is collected inside the machine.

Technical Data					
Separation type	Punch blade				
PCB thickness	max. 2.5 mm				
Air connection	1/4"-plug-in coupler				
Operating pressure	typical 4 bar				
Mains voltage	10 - 35° C				
Storage/transport temperature	-20 - 50° C				
Humidity, non-condensing	10 - 85%				
Safety regulations	CE, FCC class 1				
Weight	2.7 kg				
Dimensions H x W x D	170 x 220 x 255 mm				

-ength of blade

Free of compon

Length of cut

on solder side

Width of off-cut

Length of milled groove

12/25

T-Blade With the T-blade off-cuts can be punched out right and left of the blade without turning the PCB.

L-Blade The L-blade will be used if there are small distances between the off-cuts.

Included in delivery.

Blades

Width of milled groove To ensure the blade will not be jammed in the PCB, the blade should be at least 0,15 mm smaller as the milled groove.
